

COASTER 470

ENJOY THE "SMALLER" THINGS

**JOKER
BOAT**
CREATE YOUR UNIQUENESS

**fun without
a doubt**

Born to follow you everywhere, trailerable, stable and easy to drive. Once in the water the COASTER series inflatables will amaze you with their performance. Essential, concrete and capable of performances at the top of the category; they'll amaze you even in the most difficult conditions.

AT SEA WITH YOU

For leisure

Being small and easy to handle, the Coaster 470 has the prerogative of being a vessel easy to use and manage. Trailerable, it will follow you everywhere and will become an adventurous companion providing space on board, good navigability and zero stress.

For renting

The Coaster 470, being under 5 meters in length, is light enough to favour engines with low HP, thus allowing the offer of a boat suitable for anyone. Handy and essential, it also requires little maintenance.

For work

The Coaster 470 is also a strong and durable work boat, particularly in its Open version. It is often used for port assistance, by firefighters, for search and rescue, support for regattas and much more.

boat equipment

At the bow of the console, **a padded backrest** perfect if combined with the seat cushion, provides an extra seat. A modular sundeck extension merges with the console seat extending the sundeck.

Under the bow sundeck, **two comfortable lockers** compose the available storage space. The first was designed for the anchor and the chain while the second for stowage of various materials or for safety equipment.

Under the seat, **a locker** gives to access the console. Inside this locker lies the fuel tank, concealed under a wooden floor. This floor creates a surface divided from the fuel tank to allow placement of objects in the console.

ER COASTTE

On the side of the console a **useful inspection hatch** allows a quick intervention in case of need whilst an integrated shelf provides extra storing space. **The windshield**, with stainless steel handrail, protects the pilot and provides an extra grip for the safety of passengers during navigation.

The console positioned laterally on the starboard side of the boat but with a central driving, leaves ample space on the port side allowing a wider and easier passage from stern towards the bow. Despite being small in size the console area has sufficient space for the installation of basic navigation instruments. The height of the console is optimal for standing and seated riding.

The aft seat consists of a comfortable cushion suitable for two people to sit. Equipped with a rotating backrest, it allows the captain to use it as a back rest while standing up. At the stern beneath the driving seat a **large and deep locker** characterises the aft storage space.
